Friction Materials & Phenolic Bearings

April 30, 2015

Dear Customer,

Scan-Pac is proud to announce the release of our new smartphone app for iPhone and Android phones. The app gives users the capability of selecting the right friction or phenolic material for over 40 different applications and offers a regional distributor locator with contact information.

The *Material Recommendation* part of the app will guide the user through the material selection process. First, the app user will select one of five different brake or clutch categories. The app lists common applications associated with the particular brake or clutch category and will also list Scan-Pac's material options and data sheets.

After the user selects an application and identifies the proper material for the application, they can go to the *Distributors* section to locate their nearest distributor. Our distributors are well versed on Scan-Pac materials and will help you order the specific material needed for your application. If you would like further discussion with one of our application specialists, feel free to contact Scan-Pac directly at 262-255-2525 or sales@scanpac.com.

Friction Materials & Phenolic Bearings

Please download at the app store or Google Play. You can also find links to the Scan-Pac app on our website at www.scanpac.com.

Please watch for regular updates to this app as new materials are released. Also, note that we are currently working on an iPad version that will be updated and available soon.

Scan-Pac Manufacturing is a manufacturer of non-asbestos friction materials and phenolic laminates to use in a wide range of industrial and oilfield applications. The company has three manufacturing locations that include two facilities location in Menomonee Falls, Wisconsin and one in Magnolia, Texas. Scan-Pac employs 110 people and has proudly been in business for over 40 years.

Thanks and Best Regards,

Jeff Lichey
